

# 2BM D.T. vehicles

We studied the design of different toy vehicles and learnt what the different parts of a vehicle were called. Next we experimented with attaching wheels on to a axle in three different ways to see which gave the smoothest ride. After this we designed our own vehicles and learnt how to attach an axle onto a chassis securely and ensure the wheels would turn. Finally, we had a lot of fun making our own vehicles and here they are....
