

Highfield Maths: A Parent Guide to Helping Your Child at Home

Highfield Maths Overview

At Highfield, we use the White Rose Maths Scheme of to support our planning, teaching and learning of maths as it follows a mastery approach (see our maths policy for a more detailed explanation of mastery).

- Our long term plans detail the sequencing of topics for each year group, with our medium term plans providing greater detail of the content taught. Click on the year group below to view them:

- The progression of skills throughout the year groups is detailed in our document [here](#).

White Rose Maths

White Rose Maths provide excellent schemes of learning ([found here](#)) which we use to support our planning. However, they have also produced a wide range of resources including videos tutorials, work booklets and calculation policies to assist parents and carers at home in supporting your children. You can find these useful materials at the foot of the webpage. Many of the links to these resources for each year group are detailed in the year group box on the following page of this document for ease of access. The workbooks are also available on Amazon for the Kindle should parents not have access to a printer.

Maths No Problem

In Key Stage 1, Maths No Problem textbooks and workbooks are used to support learning. It is a series of high quality textbooks which support teaching mastery in maths using an approach developed from the highest performing nations, such as Singapore. A link to the parent videos on the Maths No Problem website can be found [here](#) and in the Key Stage 1 year group information boxes on the following page.

Timetable Rockstars

From Year 2, each child is given a Times Table Rockstars individual login to support their retention of times table facts. It is a sequenced programme which is designed to boost recall speed which underpins mathematical understanding. If your child has lost their login then please contact your class teacher who will issue a new one.

BBC Bitesize

BBC Bitesize has a range of videos, quizzes and activities to help children learn at home. The tutorials can be used to help guide children through tasks and also offer opportunities to play fun maths games.

If you would like any further information or assistance with helping your child in maths at home, please do not hesitate to get in touch with our maths leads, Mr Feeley and Ms Wragg, by contacting the school office.
